

TOP FIVE REASONS WHY LET'S TAKE A SELFIE IS A WEDDING MUST HAVE

1. **It's Entertainment And A Party Favor In One.**

Gone are the days wedding guests have to stand around waiting for the “stars of the show” to arrive from picture taking. Your guest can get the party started right away with Let's Take A Selfie! Our selfies make a great party favor too!

2. **It Encourages Spontaneity.**

While a photo booth isn't meant to replace a professional event photographer, a potential downside to ONLY hiring a professional photographer is the task of taking photos is limited to one person, the photographer. With an open photo booth, you can tap into the virtually unlimited creativity, spontaneity, and selfie-loving fun of ALL of your guests. So let your photographer capture the big moments, but give your guests the ability to leave hundreds of other hysterical moments to smile, laugh and remember for a lifetime! A photo booth is incredibly inviting and leads to the spontaneous and the hilarious.

3. **It Doesn't Put Pressure On Guests.**

You will find that many of your guests want to let loose and have fun, but are, to put it simply, shy. Some may be intimidated by a photographer or be afraid they're not being captured in the best light (pun intended!). An open photo booth, however, is an entertainment option that will be available in the background of your event the whole time, whenever guests choose to use it. When they are good and ready, they can go to the booth on their own prerogative, often encouraged on by friends and family, and capture their best – and often silliest – moments on film.

4. **Instant Gratification Anyone?**

Modern society has become obsessed with speed, and more importantly, with NOT waiting for anything. Your guest will LOVE having their photos delivered instantly on high-quality, custom-designed prints. Not only do you get all the hi-resolution photos printed out but you also will receive a digital copy and your guests will have their own memories, in their own hands and on their own smart phones – instantly!

5. **No squishing!**

It's a photo station, not an old-timey photo booth. So no worries about everyone squishing all together in a tiny photo booth. Plenty of room for plenty of people, plenty of props and plenty of fun!
